Mumbai	576 km.

HOSUR

Hosur, NH-7, Village Adkurukki, district Krishnagiri, Tamil Nadu

Total Land Area : 87 Acres (3789720 Sq. Ft.)
Floor Space Index & ground coverage ratio : 1894860 Sq. Ft.

DISTANCE FROM HOSUR:	
Mysore	175 km.
Kochi	510 km.
Chennai	308 km.
Coimbatore	326 km.
Madurai	396 km.
Pondicherry	273 km.

TECHNOLOGY IN OUR WAREHOUSING & SUPPLY CHAIN

RACKING

We can provide you suitable racking considering the nature, size and weight of goods to be placed on them. We construct racking using best quality material that is thick and capable to bear the heavy weight. They are also weather resistant and do not get spoiled with the change in temperature or weather condition. Not only that, they are 6 inches above the floor so that the goods placed on them do not get damaged or spoiled due to any mishap. We charge for what we provide, thus our racking are quite affordable and provides full value against the money.

IOT (INTERNET OF THINGS)

Our industrial IOT solutions provide improved operational efficiency & productivity through supply chain visibility and green practice

Industrial IOT refers to the convergence of Information technology and operational technology bridging digital and physical worlds. It enables complete visibility, reduced complexity, improved operational efficiency and increased the productivity of processes in the industry. The Industrial Internet of Things (IIoT) integrates sensor data, machine to machine communication and analytics to facilitate fact-based decisions that improve the effectiveness of different predictive processes.

BARCODE & RFID

BARCODE SCANNERS: are mandatorily installed at all Warehouses for complete accuracy and inventory management. These barcode scanners are super fast to read data in comparison to any human intervention for recording the same which is extremely helpful in having a control over the inventory of goods coming in and going out from the Warehouse hence leads to fast and reliable data collection & faster access to any required information at any given point of time.

RFID is efficient way to transfer data and track items. RFID tags can store up to 100 times the data of barcodes, allowing the management to keep track of all inventories such as Lot and the Serial number, Size and location etc.

CONVEYORS

Our Conveyor solutions facilitate intralogistics material movement with various load weights and high throughput rates Pallet conveyors are also referred to as 'Unit-load carriers'. Our pallet conveyors handle pallet loads up to 1500Kg and of varied dimensions. Belt conveyors are used for transporting materials of different sizes both light and heavy. Material movement happens on an endless loop belt that is being pulled between two or more pulleys. Case conveyors are the most common applications of material movement and they can be used to transfer variety of materials like totes, cartons, polybags, and container boxes.

PICKING

Our advanced Picking technologies automate the picking processes to achieve high through put and picking accuracies Pick-to-Light and Put-to-Light solution is efficient Paperless product Picking and Order fulfilment automation solution which enhances productivity and picking rate in order picking operations. Pick to Voice offers paperless hands-free order picking and fulfilment solutions for our warehouse with high accuracy and productivity. It is Voice-directed picking solution with AI for pick operations.

SAFETY FEATURES

Fire Safety: Fire can have a devastating effect on a business and poses a serious risk to the safety of warehouse inventory. Thus, to ensure our warehouses and goods remain intact and protected from fire, state-of-the-art Fire Safety Systems has been installed and maintained fire suppression. Deluge fire sprinklers are also used in our warehouses, along with rack fire suppression systems.

CCTV Surveillance: Surveilling warehouses faces its own set of challenges. Therefore, CCTV Camera provides the automated surveillance giving the ability to spot troubling behavior without human supervision. Installing CCTV security cameras relies on strategic placement of cameras and observation of the same that helps to effectively reduce the crime and theft. We have installed CCTV cameras in all our warehouses that are monitored, primarily for 24x7 surveillance and security purposes.

BEST WAREHOUSE CONCEPT FOR OPEN LAND

APML VIRTUAL WAREHOUSE / YARDS

Are you pained at the damages & loss caused due to multiple mishandling of your consignment at your present Warehouse of your present logistic partner or at your own distribution center?

HEARTFELT CSR INITIATIVE

Driver's Nindra Daan Kendra

Truck Driver on Road

Truck Driver in "Driver Seva Kendra"

As a corporate we have always believed that giving back to the society & nation is very important, especially to the neglected citizens of our country. Hence as a CSR initiative APML started "APM Driver Seva Kendra" at Dudu, NH-8, Jaipur to reduce the highway accidents caused due to the lack of rest & sleep by Truck Driver. For last 2 years, this Kendra alone has been able to save 41 lives each month, by providing rest & sleep to more than 15000 drivers per month.

Welcome on arrival.... by washing driver's feet

Free Shaving & Cutting Facility
